PROFESSIONAL PROFILE

Full-stack Software Engineer with over 5 years of professional experience designing and shipping high-performance web and mobile applications across SaaS, B2B, and consumer platforms. Proven track record leading engineering teams, driving technical migrations, and delivering measurable product outcomes. Deep expertise in React, Next.js, TypeScript, React Native, Ruby on Rails, and modern cloud tooling. Currently based in Zürich on a Swiss B permit and immediately available for full-time roles at growth-stage startups.

PROFESSIONAL EXPERIENCE

Freelance Engineer & Personal Sabbatical | [Self-employed](#)

Jul 2024 – Present

Remote

- Took an intentional career break to relocate internationally and pursue independent software projects.
- Built and launched Applybase (applybase.app) — a SaaS platform for tracking and visualising job searches with embeddable waitlist forms.
- Developed Lobstr Social — a React Native mobile app connecting racket-sports players, deployed to both iOS and Android.

Software Engineering Lead | [Going \(formerly Scott's Cheap Flights\)](#)

Jun 2022 – Jun 2024

Remote (US-headquartered)

- Led the launch of Going's first React Native mobile app, which reached 500,000 downloads within three months of release.
- Guided the web engineering team through multiple revenue-generating experiments and iterative feature rollouts as the lead engineer.
- Spearheaded a full application rebrand while simultaneously migrating a legacy Rails-rendered React codebase to a modern Next.js frontend backed by a Rails REST API.
- Delivered the Going for Teams B2B dashboard, introducing TailwindCSS to significantly improve development velocity.

Software Engineer | [DroneDeploy](#)

Jan 2022 – Jun 2022

Remote (US-headquartered)

- Architected and implemented deep-linking functionality across a hybrid Cordova application built with TypeScript and Angular.
- Researched and developed cross-platform deep-linking strategies for iOS and Android mobile applications.
- Mentored team members on deep-linking implementation patterns and established best practices for the team.

Software Engineer | [FlightAware](#)

Feb 2020 – Dec 2021

Remote (Houston, TX, USA)

- Built product purchase wizard and account management interfaces for FlightAware Aviator using React, implementing the company's first Redux integration.
- Established an automated testing culture by introducing Jest and React Testing Library across web applications.
- Led the FlightAware Web Accessibility Initiative: drafted the WCAG 2.1 compliance roadmap and implemented site-wide accessibility improvements.
- Trained development colleagues on accessibility requirements and embedded sustainable best practices into the engineering workflow.

- Operated CRJ regional jet aircraft within strict standard operating procedures, maintaining an exemplary safety and on-time performance record.
- Developed strong situational awareness, high-stakes decision-making, and leadership under pressure — competencies that continue to inform engineering leadership practice.

SELECTED PROJECTS

Applybase | [applybase.app](#) 2024 – Present

- SaaS job-search tracker.

Keg Track | [kegtrackapp.com](#) 2023 - Present

- Mobile inventory-management app for the hospitality industry and hobby beer brewers built with React Native, Supabase, and PostgreSQL.

TECHNICAL SKILLS

Languages	TypeScript · JavaScript · Ruby · Python · Go · Dart · PHP · GraphQL · PostgreSQL · HTML · CSS/Sass
Frameworks	React · Next.js · React Native · Node.js · Express · Ruby on Rails · Angular · Flutter · Redux · TailwindCSS
Testing & QA	Jest · Vitest · React Testing Library · Cypress E2E · Storybook
CMS / Headless	Strapi · Sanity · Contentful · Webflow
AI / APIs	Anthropic Claude API · OpenAI API · Claude Code
DevOps & Cloud	Git · GitHub Actions · Docker · Vercel · Supabase · Firebase · Netlify · DigitalOcean
Tooling	Stripe · LemonSqueezy · Launch Darkly · PostHog · Linear · JIRA

EDUCATION

Bachelor of Arts — Music Education (All-Level Certification) | [University of Houston](#) 2005 – 2010
Houston, TX, USA

HOBBIES & INTERESTS

Watch Repair & Restoration — Passionate about the mechanical craft of horology; experienced in servicing, disassembling, and restoring vintage timepieces.

Tennis — Active participant in community tennis ladder matches.
